I do. Between the IT forum talk and a few meeting this afternoon, the best time would be after the IT presentations, so 3pm EST. Would that work for you?

Eric,

So who is Monty and how can I help getting them the developers license? Or would this be an ODC support item on the TO?

On a side note, it's not looking good for the R1 COP viewer to live on the EPA procured/contractor managed cloudspace. Tom Giffen and Steve Boudrot are not budging and feel that the existing safety protocols that are in place for the Weston managed server are not sufficient. They brought up the fact that everything has to go through a TIC because of the new DHS TIC architecture document (attached). Tom even started asking questions about the ERT cloudspace and whether or not they are following the Risk Management Framework but I steered away from those questions and said Joe is working closely with OEI.

So pretty much their stance is just pissing me off and all of this got brought up because our GIS chief (Alex Ditchter) wanted to make sure all of the hosting has been blessed by IT security before she moves the viewer to the Weston cloudspace.

Dan/Eric.

We have been working on getting things set up for the RM Security Authentication Widget as well as creating a security role based system for individual Rest Services on the Cloud. We are at a point where we need to start testing and debugging and seeing the interactions with the WebAdaptor. We do not want to continue this process on the Production ArcGIS Server on the cloud. We are afraid of interruptions to the production environment that now has multiple regions hosting Rest services and Flexviewers that could be affected.

With that being said we wanted to create an ArcGIS 10.1 development environment on a local server space here. Unfortunately to do this we need an ArcGIS server Developers license. Do you think you would be able to get on from Monty for us? We have one in the pipeline for Weston to purchase but will not be approved until late summer.

Let me know your thoughts and if you want me to start the ball with ESRI EPA Support.

Thanks.

**Subject:** Authentication Widget

Brad,

I was seeing how the authentication widget was coming along? I would still like to run a test on the widget and get R1 involved in the login credentials manager. I'd like to get everything in before the

Biowatch has their field exercise in mid to late June (finale date isn't set).

I was also wondering if you guys have a fact sheet/brochure on response manager. After the meeting today with the biowatch group they wanted to continue sharing some of the information I gave them about ESRI Flex, Viper and Response manager since Mike and I are still pushing to have the R1 Biowatch Viewer as a national standard/template.

Thanks

Dan
